

SOUTHEASTERN UTAH ASSOCIATION OF LOCAL GOVERNMENTS COMMUNITY ACTION PLAN

Organizations Mission

Assist those in need to become increasingly self-sufficient or to avoid greater levels of dependency through innovative, comprehensive services, and collaborative efforts with local, State, and federal partnerships.

Vision Statement

Community and collaborative action to assist people with working towards and achieving self-sufficient goals set by those in need.

Prioritized Issues

ISSUES AREAS

Jobs/Intergenerational Poverty: It was identified in the data gathering methods, by our partners, and by our staff that lack of jobs and Intergenerational Poverty affects many people attempting to exit poverty. The data identified that without jobs that pay a living wage, people cannot achieve self-sufficiency. Lack of jobs affects many people attempting to exit poverty and also keeps families living in intergenerational poverty. Lack of jobs that pay a self-sustaining wage was the biggest barrier. In our rural region the intergenerational poverty rate ranges from 13% to 28% in San Juan.

Mental Health/Addiction: It was identified that Mental health/addiction committees that adequate mental health services are a high priority. This issue affects many people attempting to exit poverty. Low-income people rarely have insurance and Medicaid provides limited mental health services. The data identified that Mental Health/Addiction was the second biggest barrier and staff identified that this affects many people attempting to exit poverty. With the growing number of individuals with opioid addiction, receiving mental health services is critical in recovery.

Transportation: It was identified that lack of transportation affects many people attempting to exit poverty. The data identified that the lack of accessible/affordable transportation in rural counties was the third biggest barrier. Lack of funding sources and rural populations make developing public transportation programs extremely difficult. In our rural region, accessible transportation does not exist. Non-reliable transportation cost

is too high. 20% of respondents in focus groups stated that lack of transportation has prevented them from either obtaining employment or needed services.

Housing: It was identified that lack of affordable and accessible housing affects many people attempting to exit poverty. In Carbon, Emery, Grand and San Juan counties, housing that is affordable and easily accessible to people is a challenge. Housing that meets basic habitability standards is also a priority. It was identified that the lack of affordable housing was the fourth biggest barrier.

Homelessness: It was identified that homeless affects many people attempting to exit poverty. In Carbon, Emery, Grand, and San Juan counties there is a lack of shelters for homeless individuals to reside at until they can become stably housed. The data identified that the lack of shelters and funds to assist homeless individuals was the fifth biggest barrier.

Food Insecurity: SSI and social security recipients live on less than those in the state, but face higher food costs due to the distance required to access food, fewer grocery store resources, and even fewer co-op or bulk-food purchasing options. Given the higher than average utility cost that were identified in the need assessment as well, this shows that families will have a more difficult time affording food when utilities are high in the winter and summer. Some SSA/SSI recipients are also care takers for their children and grandchildren. In San Juan County, over 98% of K-12 students are eligible for free or reduced school lunch – a strong indication that entire families face food insecurity.

BARRIERS TO EXITING POVERTY

Lack of jobs with living wage/Intergenerational poverty: It was identified in the data gathering methods, by our partners, and by our staff that the lack of jobs that pay a living wage is a major barrier for families trying to exit poverty. During the last year Carbon and Emery counties have had a slight increase in jobs but the median household income was 25 percent less than Statewide. In Grand and San Juan counties, where the economies are based on travel/tourism, the average wage is only \$2,693 per month. The required living wage for Grand County is \$3,991 and that is what is needed monthly. Very few of the available jobs include benefits. Lack of self-sustaining wages also continues to keep individuals/families living in poverty and intergenerational poverty.

Mental Health/Addiction: It was identified that mental health/addiction is a high priority barrier in assisting low income individuals in achieving self-sufficiency. Low paying and part-time work rarely include health insurance benefits making it extremely difficult for low-income people to obtain the services they need. Opioid addiction is rising in our rural region and with limited mental health agencies and resources to assist individuals / families this continues to be a barrier.

Accessible and Affordable Transportation: It was identified, that the complete lack of public transportation is a barrier to self-sufficiency. The region is geographically large but very sparsely populated. The cost of developing standard public transportation options compared to the number of potential users and their ability to pay the required fees prevents these public services from being offered in rural areas.

Affordable Housing: It was identified that affordable housing is a barrier to self-sufficiency. In many areas of the region the cost of housing (including utilities) is over 30% of the average monthly low-income wage. The fair market rent in Grand County is \$851 a month and with the average monthly income of \$2,693 a month in Grand County the cost of housing including utilities often exceeds 30% of an individual/families gross monthly wages. The communities where housing is affordable are usually those that do not have much of a job base and no public transportation is available between these communities and where the jobs are. Also, much of the housing stock, affordable to low-income households, in the region does not meet minimum habitability standards.

Homelessness: It was identified that homeless is an issue in our area and in our rural areas. Without temporary shelter and limited funding for homeless services, homeless individuals/families struggle in reaching self-sufficiency. Staff identified that building stronger networks and applying for additional funding to assist homeless clients to help with needed services.

Food Insecurity / Family Stability: SSI and social security recipients live on less than those in the state, but face higher food costs due to the distance required to access food, fewer grocery store resources, and even fewer co-op or bulk-food purchasing options. Given the higher than average utility cost that were identified in the need assessment as well, this shows that families will have a more difficult time affording food when utilities are high in the winter and summer. Some SSA/SSI recipients are also care takers for their children and grandchildren. In San Juan County, over 98% of K-12 students are eligible for free or reduced school lunch – a strong indication that entire families face food insecurity.

GAPS IN SERVICES

Lack of Primary Jobs/ Intergenerational Poverty: It was identified in the data gathering methods, by our partners, and by our staff that Carbon, Emery, Grand, and San Juan County lacks jobs that pay a self-sufficient wage for families. With limited jobs in our rural counties that do not provide either a self-sufficient wage and or benefits, it is not only a gap but also families living in intergenerational poverty have a difficult time in moving out of poverty and this cycle may continue to the next generation.

Lack of Access to Mental Health and Addiction Services: Comprehensive mental health/addiction treatment services are not affordable. Many low-income people, who do have jobs, don't have employer provided health insurance and aren't eligible for Medicaid. Medicaid benefits are also limited in providing mental health services and addiction recovery services. Local public mental health districts have very few funds to provide extensive services to people who can't pay out of pocket and don't have insurance coverage. From our data gathering methods it was determined that 31% of respondents do not have health insurance.

Lack of Accessible and Affordable Transportation in Carbon, Emery, Grand and San Juan Counties: There are specialized programs to provide transportation for medical services. The senior citizen programs in each county provide limited transportation services to the senior centers and medical services. There is no local public transportation system anywhere in the region. Low-income individuals who cannot afford a vehicle are limited in their ability to access jobs, education, shopping and medical services.

Lack of Affordable and Accessible Housing: Outside of the main city areas in Carbon, Grand and San Juan Counties, housing is more affordable. Housing within the main cities where the jobs are primarily located in, housing is not always affordable. Despite the construction of 2 multi-family rents projects in Carbon County, multi-family rental housing in the three county areas is lacking. In Grand County, tourism drives many affordable housing units to be transformed to nightly rentals and housing costs continue to rise and costs are extremely high compared to other resort communities in Utah. Housing that meets minimum habitability standards is also an issue for low-income households. Currently 33% of households in our rural region who rent are rent overburdened meaning that over 35% of families monthly income goes towards rent.

Lack of Shelters: In Carbon, Emery, Grand, and San Juan counties, there is a lack of services for homeless individuals/families including emergency shelters. With limited resources in our rural counties, partnerships that have funding for homeless services are being exhausted quickly and there are limited solutions in helping homeless individuals/families in reaching self-sufficiency. Homeless rates are increasing and many individuals are finding hidden areas to pitch a tent even in the extreme winter months. These hidden places are often unsafe and further from needed services. With the rising cost of rent and low wages, this also contributes individuals/families to become homeless.

SERVICE NEEDS

Available jobs to achieve self-sufficiency/reduce Intergenerational Poverty: Many jobs in our communities do not pay a living wage for families to reach self-sufficiency. The jobs available in sectors such as tourism travel pay slightly above minimum wage, rarely provide family sustaining benefits, and are usually part-time and seasonal, thus preventing families reaching self-sufficiency and or remaining in Intergenerational Poverty. Clients are referred to available job training resources and programs offered by the Department of Workforce Services.

Available Mental Health Services: Mental health service providers are very limited in rural communities. If a client isn't eligible for services through the public mental health district, or the services for which the client is eligible aren't adequate or don't fit the client's situation, there are no other affordable service providers in the region. Staff will participate in community mental health coalitions to coordinate and more efficiently use services that are available.

Affordable transportation to assist with vast distances to find employment: There is not public transportation anywhere in Southeastern Utah. There are limited specialized transportation services for medical care, people with disabilities, and senior citizens. The region's service provider agencies coordinate with each other to efficiently use the very limited resources and collaborate on ways to increase our community's limited transportation.

Access to affordable housing and compliant landlords: Potential housing clients typically wait for a long time to get into subsidized housing and Section 8. Family Housing assistance is needed beyond the 4 months to help families afflicted with addiction or domestic violence issues. Staff will strengthen partnerships with other agency programs such as TANF Family Housing, Housing Authorities, housing rehabilitation, and landlords in

our counties to strengthen compliance and to also increase collaboration between landlords and clients so they have a better understanding of policies.

Access to increased services for homelessness: In our rural communities there is a lack of transitional housing and limited resources to assist homeless individuals/families. Due to limited resources, homeless individuals/families often have lack of not only shelter but many needed and essential services. Because of the stigma on many homeless individuals, in our rural communities homeless individuals often set up tents in unauthorized areas which are farther from services. The agency will work toward expanding and applying for additional funding to assist homeless individuals/families and build strong collaborations to Local Homeless Coordinating Committees in our region to increase services.

CAUSES OF POVERTY

Lack of available jobs and adequate income: It was identified in the data gathering methods, by our partners, and by our staff that most people are in poverty because they lack solid employment with adequate wages, and lack of training and resources to move them out of Intergenerational Poverty. While deficient education/job skills and substance abuse also contribute to poverty, other issues that prevent families from breaking out of the cycle of poverty include:

- **Knowledge of how to properly save, budget and use income:** People in poverty often don't understand how they can save their money and or how to budget properly. Families in poverty are often victims of high interest rates, pay-day lenders, and tax refund schemes.
- **Transportation in access jobs, medical appointments, shopping and schooling:** In order for low-income families to start the process of breaking out of poverty they need access to transportation to meet employment, medical, nutritional, and school needs.
- **Adequate housing availability:** A majority of housing (rental) in this region are either older single family homes or trailer/mobile home units. There is limited affordable multi-family housing development s in Southeastern Utah. Much of the affordable housing in the region does not meet minimal habitation standards. By building strong relationships with landlords and the Housing Authority, it will provide low-income individuals and families a better understanding of what is available and accessible.
- **Adequate Mental Health Resources:** Due to limited mental health services in the region, it becomes a challenge for individuals/families to receive the services that they need. By building stronger partnerships with Four Corners Behavioral Health, and San Juan Counseling Center it can help identify the resources in the community for these individuals/families.

LINKAGES/PARTNERSHIPS

Employment Availability: Department of Workforce Services offers job training and life skills programs, assistance with resume writing, job coaching, etc. USU-Eastern Workforce Development Department provides nested education opportunities that start with 6 week to 1 year certificates with courses that allow students to continue their education through a four-year degree. Strengthen

partnership with Utah State Eastern to assist individuals in Rural Online Initiative to prepare rural workforce with education, training, and services in remote employment.

Asset Building/ Soft Skills: Clients will be referred from agency and community programs to create a budget and follow it, have an understanding of their credit score, how to increase their credit and create a savings account. Soft skills training will be provided as well to help individuals strengthen communication, time management and leadership to help individuals reach the path to self-sufficiency.

Transportation Services: Clients are referred to the limited transportation resources that are available from the region's service providers

Housing Availability: Eligible clients are helped to access the TANF Family Housings programs. Clients are also referred to the region's housing rehabilitation, weatherization, and utility assistance programs. SEUALG will strengthen partnerships with Housing Authorities and landlords in region to assist individuals/families in finding safe and affordable housing.

Homelessness: Eligible homeless individuals and families will be referred to the Homelessness Funding programs and will be provided with the tools to become stably housed. SEUALG will continue to strengthen partnerships with Balance of State and Local Homeless Coordinating Committees within our region to increase communication and support for individuals/families experiencing homelessness.

Department of Workforce Services: Refer clients to agency to apply for food stamps, provide application help, and communication tools to better access available nutritional services.

Domestic Violence Shelters: referring clients to shelters for family and domestic violence assistance, and assisting with funding to find new housing for their families.

Partnerships include: Department of Workforce Services

Division of Child and Family Services

Active Re-Entry

Housing Authority of Carbon County

Southeastern Utah Association of Local Governments (housing rehabilitation, Weatherization, HEAT program, TANF Family Housing, Homelessness Services).

Southeastern Utah Area Agency on Aging

Housing Authority of Southeastern Utah

Senior Centers

San Juan Foundation

USU Eastern and Sun Center Volunteers

Multi-Cultural Center

Four Corners Behavioral Health

Southeastern Utah Health District

Local Churches/Religious Organizations

Domestic Violence Shelters

Arrive Utah

Circles USA

Utah Food Bank

United Way of Eastern Utah

Easter Seals

Deseret Industries

Head Start

CAP Utah

Southeastern Utah Community Development Corporation

City and county elected officials and planning department staff

County Economic Development Offices

RESOURCES

State Grant for Financial Programs: We identified grants from Health and Human Services. This grant will help our organization provide financial incentives and classes for those who are seeking the skills needed to reach economic stability.

Private organization: Working with organization like Future In Design and Blacksmith International to help individuals/families with the tools and resources needed to sustain and or increase employment.

SEUALG Programs: Working with other programs in the agency to coordinate services for low-income clients.

United Way: Increasing partnership to strengthen Housing Alliance, Local Homeless Coordinating Committee and other community programs.

CAP Utah: Collaborate to better focus on available local, State, federal, and private resources in assisting low-income individuals/families to acquire the skills and knowledge to achieve self-sufficiency.

City Mayors: Working with city Mayors (Castle Dale, Blanding, and Bluff, along with Navajo Nation)

Commissioners: Working with County Commissioners in (Carbon, Emery, Grand, and San Juan).

Intermountain Farmers Association: Continue partnership to increase community gardens in the four counties.

Southeastern Utah Association of Local Governments

Community Needs Assessment

Data Analysis

Executive Summary

The Southeastern Utah Association of Local Governments (SEUALG) is an interlocal government agency that functions as a public Community Action Agency for the purpose of receiving Community Services Block Grant funding on behalf of its member counties. The SEUALG also provides aging, economic and community development and other community service programs in Carbon, Emery, Grand and San Juan Counties. This is a very large region, covering 17,574 sq. miles, which represents approximately 21% of the state of Utah. The SEUALG service area includes the “Utah Strip” section of the Navajo Reservation and small portions of the Southern Ute

Reservation lands. This is a very sparsely populated region and overall the population has been declining. In 2017 the district population was 55,397 but in 2017 the estimated population was 55,402. The average poverty rate for the region is 17.5%. The SEUALG currently receives an annual CSBG grant of approximately \$135,915. All of the CSBG funding is used to operate food banks in Carbon, Emery and Grand Counties, and a supplemental home delivered, prepared meal nutrition program for very low income and disabled residents of San Juan County. Food bank employees provide basic case management and resource/referral information to food bank clients to link them with other programs available through the SEUALG and partner agencies that provide services and activities to help address issues of employment, education, better management of available income, housing, nutrition, and/or health to help combat the central causes of poverty. By linking clients to these services, it increases families in reaching self-sufficiency.

The data collection efforts for this three year needs analysis include; town hall type meetings in all four counties, surveys, American Fact Finder/U.S. Census Bureau data, etc. Surveys were conducted through direct email, paper surveys provided at the various meetings, and via the web using the Google Forms system. SEUALG entered all paper surveys into the Google Forms system. SEUALG partnerships and community services staff tabulated the information collected from the survey process.

SEUALG staff met regularly throughout the year with district service providers and advocacy groups, such as Interagency Coordinating Councils, Local Homeless/Affordable Housing Coordinating Councils, CARE Coalition, Tripartite Board, United Way Board, community

development boards, economic development boards, aging programs, mental and public health department, school districts, and housing authorities. Other data was gathered from published poverty reports, the Governor's Intergenerational Poverty Report, and economic and employment data from jobs.utah.gov. Information was also provided by food bank clients, TANF Family Housing clients, while they received case management and resources/referral services. All of these data sources provided information/data the agency used to identify the needs and issues faced by those in poverty, and to help develop the priorities on which the agency will concentrate. In developing the priority issues, consideration was also given to what resources are available within the region and how these resources can be effectively and efficiently coordinated to address the needs of the region's low-income residents and improve the conditions in which low-income residents live.

The priority issues identified are:

- Lack of Jobs/Intergenerational Poverty
- Lack of Access to Mental Health and Addiction Services
- Lack of Accessible and Affordable Transportation
- Lack Affordable Housing
- Lack of Services for the Homeless
- Food Insecurity

While actions and activities will be based on information gathered during this planning process, actual program services will be based on available funding, resources and the coordination of various program requirements.

Issue Area Analysis

Priority Issue Area – Lack of Jobs / Intergenerational Poverty

As of January 2019 the unemployment rate for Carbon County is 4.4%, Emery County is 4.4%, Grand County is 4.3% and San Juan County is 5.3%. Major employers such as mining companies, gas and oil extraction companies, power plants, trucking and warehouse companies and secondary businesses such as large retail concerns, restaurants, etc. have gone out of business and laid off all their employees in three of the region's four counties. Grand County has shown an increase in job creation, however, most of that increase has been in the low paying tourism/travel/services sectors. The wages in these jobs do not pay family sustaining wages, rarely have benefits, and are often seasonal and/or part-time. Without good jobs, including benefits, people cannot achieve self-sufficiency. With lack of jobs continuing to be a prioritization, this ties in closely with Intergenerational Poverty. With lack of high paying jobs with benefits it makes it very difficult for families to reach self-sufficiency.

Lack of education and job skills also prevent low-income individuals and individuals living in intergenerational poverty from securing good jobs with wages that are high enough to provide for their families and sustain a self-sufficient lifestyle.

Lack of economic opportunity and job growth is the most prevalent gap in southeast Utah. Service providers in the region coordinate services to help low-income residents obtain education and job training, life skills training, job coaching and referral to possible job opportunities.

Available resources include support services such as housing and utility payments, resume writing, job training opportunities funded through state/federal programs, Asset Building to teach individuals how to budget, manage finances and increase their credit. (Department of Workforce Services) and scholarships for workforce development training and Custom Fit training through USU-Eastern. Carbon County is piloting the Circles Initiative which helps provide the tools and resources, soft skills training and workforce development for families living in intergenerational poverty to reach economic stability.

Inter-Generational Poverty has been identified as a significant concern in Carbon, Grand, and San Juan County.

Priority Issue Area – Lack of Mental Health and Addiction

Because of the small population in this district and to ensure compliance with HIPAA and/or CFR 42, county level data on mental health and substance abuse is very limited. However, information shared by program clients indicates that up to 80% of individuals in these low-income households experience problems with mental health and substance abuse. In general, substance abuse is a fairly severe issue in southeast Utah. Among Utah's local health districts, Southeast Utah had significantly higher prescription opioid death rates compared to the rest of the state. There are several private mental health counseling businesses in each county; however, there are only two public/non-profit mental health agencies in the region. Four Corners Behavioral Health serves Carbon, Emery and Grand Counties, while San Juan Counseling service San Juan County, including the reservation areas.

Most low-income individuals have limited medical insurance resources and/or are unable to cover cost from their income, making it difficult or impossible to obtain adequate treatment services to truly address their problems. Public mental health agencies rely on Medicaid payments to cover the cost of these services, but Medicaid limits the amount that can be paid and often treatment must end before a successful outcome is achieved. Adequate funding to mental health agencies so that more counselors and more comprehensive treatment can be provided is necessary.

Service providers in the region have developed efficient partnering strategies to help clients obtain as many treatment options that are available.

Priority Issue Area – Accessible and Affordable Transportation

There are not public transportation services in southeastern Utah. Low population/customer base, extreme distances, and lack of funding prohibit the development of public transportation at this time. Low-income individuals who cannot afford private vehicles and insurance are at a disadvantage in obtaining employment, accessing shopping, medical care, education, and mental health services. Without public transportation low-income individuals must live close to jobs and other services, which usually increase their housing costs.

Several agencies provide specialized transportation for certain client categories, i.e. senior citizens, clients with medical care issues, and clients who need transport out of the area for residential mental health treatment. As much as possible, service agencies coordinate the limited transportation resources in order to provide more efficient service.

Priority Issue Area – Affordable Housing

While average housing costs in Carbon, Emery and San Juan Counties are not extreme, individuals who do not have jobs or who have low-wage jobs still have a difficult time finding housing that costs no more than 30% of their income. In Grand County, where housing costs are driven by the demand for tourist rentals, affordable housing issues are extreme.

Because southeastern Utah is a rural/remote region, multi-family rental housing is fairly scarce. Most of the multi-family rental housing has been developed in Grand County, but much of it quickly converted to tourist room sales units and nightly rentals. Because housing development has been limited in this district much of the existing housing units are over 30yrs old and are in less than acceptable condition. Finally, many of the units affordable to very low income individuals are mobile homes/trailers that are in very dilapidated condition and are NOT eligible for rehabilitation or rental payment subsidies with either HUD or USDA-Rural Development Funds.

The SEUALG operates several programs that help low income individuals obtain or improve their housing situations: Self-help housing rehab, single family housing rehab, TANF-Family Housing, Weatherization and HEAT utility payment assistance. Coordination and partnerships with other housing providers such as housing authorities, independent living agencies, United Way, etc. help connect clients with resources that they may not be aware of. Efficient partnering often helps combine resources to provide solutions to clients with specific housing issues.

Priority Issue Area – Lack of Transitional Housing

The homeless population living in the Carbon, Emery, Grand, and San Juan Counties is vastly underserved. The services offered to homeless individuals are limited and the criteria exclude a significant portion of the current homeless population. With the limited programs that are available for homeless individuals, there is a large portion of this population that is left unserved. Carbon, Emery, Grand, and San Juan County lack transitional housing and other services to provide temporary shelter for individuals to get back on their feet. The SEUALG receives Unified Funding which assists homeless individuals with first months rent, deposit, and utility assistance. With the growing number of homeless in Carbon, Emery, and Grand County funding does not cover all of the clients requesting assistance or pay for essentials or hotel or meal vouchers.

Priority Issue Area – Food Insecurity

Individuals in our rural region face higher food costs due to the distance required to access food, fewer grocery store resources, and even fewer co-op or bulk-food purchasing options. Some SSA/SSI recipients are also care takers for their children and grandchildren. In San Juan County, over 98% of K-12 students are eligible for free or reduced school lunch – a strong indication that entire families face food insecurity.

Southeastern Utah Association of Local Governments

Community Needs Assessment

Prioritization Summary

Executive Summary

Southeastern Utah Association of Local Governments has worked diligently in determining the prioritization issues that were collected during our data collection process. The issue areas include; Lack of Jobs/Intergenerational Poverty, Lack of Mental Health Services, Lack of Accessible and Affordable Transportation, Lack of Services/Homeless.

In our rural region, many individuals/families lack jobs that pay a self-sufficient wage that provides benefits. It was identified that this was also one of the causes of individuals/families remaining in intergenerational poverty. Families that make minimum wage or only work seasonal work struggle in becoming self-sufficient.

Lack of Mental Health Services in our region was prioritized as there are limited services for individuals who need services whether it is mental health counseling, or treatment for substance abuse. Many individuals do not have insurance or they have Medicaid and that does not always pay for treatment.

Lack of Accessible and Affordable Transportation was a prioritized issue as there is no accessible transportation that exists in Carbon, Emery, Grand, and San Juan County. The cost is too high to develop transportation in our rural region. Without transportation, individuals/families are often unable to obtain employment or keep employment. With the high cost of housing, individuals/families often have to move further away from services where housing costs are lower, making transportation critical to move individuals/families out of poverty.

Lack of Accessible and Affordable Housing was a prioritized issue as housing costs continue to rise and there are limited safe and affordable housing units available for families. Families often pay more than 30% for their housing costs and this makes it a challenge for individuals/families trying to get out of poverty.

Lack of Shelters / Homeless was a prioritized issue as in our rural region there is not any shelters for homeless individuals and there is limited funding available to assist with resources that are

needed. SEUALG has been working on linkages with Balance of State and Homelessness Funding to provide services to individuals in our region.

Descriptions

Priority #1 Lack of Jobs/ Intergenerational Poverty

SEUALG utilized multiple methods to collect information regarding the Lack of Jobs that pay a self-sufficient wage. Data that was collected also stated that lack of living wage jobs also contributed to intergenerational poverty.

Community partners and participants included personal interviews, focus groups, surveys and community stakeholder meetings. The data collection included low-income residents and representatives, Utah State University Eastern, Division of Workforce Services, United Way of Eastern Utah, Southeastern Utah Health Department, and IGP Workgroup.

Priority #2 Lack of Mental Health Services

SEUALG utilized multiple methods to collect information regarding the Lack of Mental Health Services and substance abuse in our rural region.

Community partners and participants included personal interviews, focus groups, surveys and community stakeholder meetings. The data collection included low-income residents and representatives, Southeastern Utah Health Department, United Way of Eastern Utah, faith-based organizations, Utah State Extension, Carbon & Emery Opioid and Substance Use Coalition, Four Corners Behavioral Health, and Community Health Clinics.

Priority #3 Lack of Accessible and Affordable Transportation

SEUALG utilized multiple methods to collect information regarding the Lack of Accessible and Affordable Transportation in our rural region.

Community partners and participants included personal interviews, focus groups, surveys, and community stakeholder meetings. The data collection included low-income residents and representatives, Utah State University Eastern, United Way of Eastern Utah, Economic Development, Department of Workforce Services, County Commissioners, and key stakeholders.

Priority #4 Lack of Accessible and Affordable Housing

SEUALG utilized multiple methods to collect information regarding the Lack of Accessible and Affordable Housing in our rural region.

Community partners and participants include: personal interviews, focus groups, surveys, and community stake holders. The data collection included low-income residents and representatives, Housing Authorities, United Way of Eastern Utah, elected officials, Utah State University, and Department of Workforce Services.

Priority #5 Lack of Shelters / Homeless

SEUALG utilized multiple methods to collect information regarding the Lack of Services/Homeless in our rural region.

Community partners and participants included personal interviews, focus groups, surveys, and community stake holders meetings. The data collection included low-income residents and representatives, Utah State University Eastern, United Way of Eastern Utah, Economic Development, Department of Workforce Services, Southeastern Utah Health Department, County Commissioners, Local Homeless Coordinating Committees, and key stakeholders.

Priority#6 Food Insecurity

SEUALG utilized multiple methods to collect information regarding Food Insecurity in our rural region.

Community partners and participants included personal interviews, focus groups, surveys, and community stake holder meetings. The data collection included low-income residents and representatives, Utah State University Eastern, religious organizations/church groups, and key stakeholders.

Others for Consideration

Minimum wage jobs were a prioritized issue that SEUALG is unable to address. National Minimum wage is currently \$7.25 per hour, yet the living wage in Grand County is \$11.25 an hour. SEUALG is unable to address federal or state policies like minimum wage.

Individuals/families in our rural region would benefit from higher wages as this could help them on the path to self-sufficiency.

Note: Demographics comparison---compare your most recent IS/Module 4 submission to demographic data for your community. Who is experiencing poverty? (Gender, Race, Ethnicity, Age)—Organizational Standard 3.2—submit on separate document.

B – Explanation of Major Data Changes

*In red is an example, please delete.

County	Data Characteristic	Explanation
Carbon	Median Income	Jobs have slight increase due to private sector jobs, however many other jobs do not provide self-sufficient wages. Median income has remained consistent.
Emery	Median Income	Jobs have a slight increase due to private sector jobs, however many other jobs do not provide self-sufficient wages. Median income rose slightly from \$49,709 to \$51,852.
Grand	Median Income	Jobs have increased due to tourism but jobs are not self-sustaining wages. Median income rose slightly from \$43,344 to \$44,858 due to increase in tourism.
San Juan	Median income	Jobs have decreased due to loss of private sector jobs but increased in tourism related jobs. Median income dropped from \$40,590 to \$39,305.
San Juan	School Lunch Eligibility	Almost 98% of K-12 students in county are eligible for free/reduced school lunch.
Carbon, Grand, and San Juan	SSI / SSA Income.	Average Social Security benefits for these counties are much lower than the state average, although food, transportation, and housing costs rising. The difference is worse for those receiving SSI – which are the most vulnerable out of SSA recipients.

Causes of Poverty

No.	Cause	Population	Data Source	County	Results and Description
2	Lack of livable wages	Families in Poverty	Surveys/Focus Groups	Carbon	28% of respondents stated that Poverty is due to an unlivable wage and keeps individuals and families living in Intergenerational Poverty. 23% of Community partners state that poverty is due to lack of jobs that pay a living wage.
3	Lack of livable wages	Families in Poverty	Surveys/Focus Groups	Emery	24% of respondents stated that Poverty is due to an unlivable wage and keeps individuals and families living in Intergenerational Poverty. 18% of Community partners state that poverty is due to lack of jobs that pay a living wage.
4	Lack of livable wages	Families in Poverty	Surveys/Focus Groups	Grand	27% of respondents stated that Poverty is due to an unlivable wage and keeps individuals and families living in Intergenerational Poverty. 19% of Community partners state that poverty is due to lack of jobs that pay a living wage.

5	Lack of livable wages	Families in Poverty	Surveys/Focus Groups	San Juan	33% of respondents stated that Poverty is due to an unlivable wage and keeps individuals and families living in Intergenerational Poverty. 26% of Community partners state that poverty is due to lack of jobs that pay a living wage.
Gaps in Services					
No.	Gap	Population	Data Source	County	Results and Description
1	Accessible Transportation	Families in Poverty	Surveys, Interviews, Focus Groups	Carbon	Lack of accessible transportation in Southeastern Utah makes it challenging for families trying to obtain employment, and obtain the services that families need. The cost of developing standard public transportation options compared to the number of potential users and their ability to pay the required fees prevents these public services from being offered in rural areas.
2	Accessible Transportation	Families in Poverty	Surveys, Interviews, Focus Groups	Emery	Lack of accessible transportation in Southeastern Utah makes it challenging for families trying to obtain employment, and obtain the services that families need. The cost of developing standard public transportation options compared to the number of potential users and their ability to pay the required fees prevents these public services from being offered in rural areas.
3	Accessible Transportation	Families in Poverty	Surveys, Interviews, Focus Groups	Grand	Lack of accessible transportation in Southeastern Utah makes it challenging for families trying to obtain employment, and obtain the services that families need. The cost of developing standard public transportation options compared to the number of potential users and their ability to pay the required fees prevents these public services from being offered in rural areas.
4	Accessible Transportation	Families in Poverty	Surveys, Interviews, Focus Groups	San Juan	Lack of accessible transportation in Southeastern Utah makes it challenging for families trying to obtain employment, and obtain the services that families need. The cost of developing standard public transportation options compared to the number of potential users and their ability to pay the required fees prevents these public services from being offered in rural areas.
Barriers to Exiting Poverty or Obtaining Services					
No.	Barrier	Population	Data Source	County	Results and Description
1	Lack of jobs paying self-sufficient wages	Individuals / Families	Surveys, Interviews, Focus Groups	Carbon	Through focus groups, personal interviews, and surveys it was identified that Carbon County has a lack of jobs that pay individuals/families self-sufficient wages. It was also identified that this is a barrier for families also trying to exit intergenerational poverty.
2	Lack of jobs paying self-sufficient wages	Individuals/ Families	Surveys, Interviews, Focus Groups Surveys, Interviews, Focus Groups	Emery	Through focus groups, personal interviews, and surveys it was identified that Emery County has a lack of jobs that pay individuals/families self-sufficient wages.

3	Lack of jobs paying self-sufficient wages	Individuals/ Families	Surveys, Interviews, Focus Groups	Grand	Through focus groups, personal interviews, and surveys it was identified that Grand County has a lack of jobs that pay individuals/families self-sufficient wages and jobs are seasonal. It was also identified that this is a barrier for families also trying to exit intergenerational poverty.
4	Lack of jobs paying self-sufficient wages	Individuals/ Families	Surveys, Interviews, Focus Groups	San Juan	Through focus groups, personal interviews, and surveys it was identified that San Juan County has a lack of jobs that pay individuals/families self-sufficient wages and jobs are seasonal. It was also identified that this is a barrier for families also trying to exit intergenerational poverty.
Individual / Family / Community Unmet Needs					
No.	Need	Population	Data Source	County	Results and Description
1	Transportation to jobs / available services	Individual	Interviews	Carbon	Limited income, no accessible transportation, lack of jobs prevents low-income individuals from attaining employment opportunities and accessing available services.
2	Transportation to jobs / available services	Individual	Interviews	Emery	Limited income, no accessible transportation, lack of jobs prevents low-income individuals from attaining employment opportunities and accessing available services.
3	Transportation to jobs / available services	Individual	Interviews	Grand	Seasonal employment, no accessible transportation, does not sustain moving individuals to reach self-sufficiency and accessing available services.
4	Transportation to jobs / available services	Individual	Interviews	San Juan	Seasonal employment, no accessible transportation, does not sustain moving individuals to reach self-sufficiency and accessing available services.
5	Food insecurity	Individual	Agency Data / Surveys / Interview	Carbon, Grand, and San Juan	High number of students eligible for free/reduced school lunch, much higher usage of food stamps, food deserts, lower SSA/SSI benefits and hourly wages.

Number of Homeless Veterans	0	0	0	0			
Number of Transitional Housing and Permanent Supportive Housing Units	0	0	0	0			
Other (see Data Element suggestions for more options)							

*use the living wage site

B – Explanation of Major Data Changes

*In red is an example, please delete.

County	Data Characteristic	Explanation
Carbon	Homeownership Rate	Average Home Price increased from \$123,000 to \$126,800 while average wage remained consistent. The price in homes may be due to the slight increase of jobs.
Emery	Homeownership Rate	Average Home Price increased from \$125,600 to \$136,200 while average wage remained consistent. The price in homes may be due to the slight increase of jobs

Grand	Homeownership Rate	Average Home Price increases from \$220,500 to \$230,900 while average wage remained consistent. The price in home has increased due to the affordability gap in Grand County is in large part due to low wages, which limit or prevent homeownership and payment of market rate rent by many households.
San Juan	Homeownership Rate	Average Home Price decreases have remained consistent during the past three years.
